ELECTRICAL EQUIPMENT TIPS

Each electrical rental item requires a certain amount of amps. For electric ovens please refer to our ELECTRIC OVEN SPECIFICATIONS sheet.

Anything that produces heat or cold takes a fair amount of power and generally requires a separate circuit for each piece of equipment.

Please note that a separate receptacle does not mean a separate circuit.

When time allows, it is recommended to check the power source at the job site prior to your event date.

Using an inexpensive circuit tester is always helpful to locate a suitable receptacle especially in residential locations.

Using an extension cord will result in a drop in power.
